

Tic Tac Toe FAQ

1. Can Xcode find and replace?

Yes! You can find it under Find -> Find and Replace... (the Find menu is in the toolbar at the top of the screen), or you can use keyboard shortcut Cmd + Option + F.

2. Can I use images for this?

Sure! They're not mentioned because technically you haven't learned much about [UIImageViews](#) yet, but it's pretty easy to pick up by looking at the relevant section in the book (or a quick internet search).

3. Can I use an `enum` for the player marks?

Go nuts!

4. Why isn't my game working?

You probably did something wrong.
